

Campus Equipment Booking API

Production Test Evidence Report

Base URL: https://campus-equipment-booking-api.course-management-api.workers.dev/api
Environment: Cloudflare Worker + remote Cloudflare D1
Test date: 2026-10-06 (UTC response date)

Summary of verified cases

#	Test	Expected	Observed
1	List equipment	200	200 PASS
2	Create booking	201	201 PASS
3	Read booking	200	200 PASS
4	Overlapping booking	409	409 PASS
5	Invalid time range	400	400 PASS
6	Update booking	200	200 PASS
7	Delete booking	204	204 PASS
8	Read after delete	404	404 PASS

Captured production responses

Case 1 - GET /equipment

```
curl -i "$BASE_URL/equipment"  
HTTP/2 200  
[{"id":"eq-1","name":"Projector A","location":"Building 1"}, {"id":"eq-2","name":"Camera Kit B","location":"Media Lab"}]
```

Case 2 - POST /bookings

```
HTTP/2 201  
{"id":"5ab82ba3-d555-47dc-a83e-c98723879619","equipmentId":"eq-2","borrowerName":"Evidence Test User","startAt":"2026-10-06T12:00:00Z","endAt":"2026-10-06T13:00:00Z"}
```

Case 3 - GET /bookings/:id

```
HTTP/2 200  
{"id":"5ab82ba3-d555-47dc-a83e-c98723879619","equipmentId":"eq-2","borrowerName":"Evidence Test User","startAt":"2026-10-06T12:00:00Z","endAt":"2026-10-06T13:00:00Z"}
```

Case 4 - overlapping POST /bookings

```
HTTP/2 409  
{"error":"Booking time conflicts with an existing booking"}
```

Case 5 - invalid time POST /bookings

```
HTTP/2 400  
{"error":"startAt must be before endAt"}
```

Case 6 - PATCH /bookings/:id

```
HTTP/2 200  
{"id":"5ab82ba3-d555-47dc-a83e-c98723879619","equipmentId":"eq-2","borrowerName":"Evidence Test User","startAt":"2026-10-06T12:00:00Z","endAt":"2026-10-06T13:00:00Z"}
```

Case 7 - DELETE /bookings/:id

```
HTTP/2 204
```

Case 8 - GET after DELETE

```
HTTP/2 404  
{"error":"Booking not found"}
```

The temporary booking used for cases 2-7 was deleted. A final GET /bookings returned an empty array, confirming cleanup.
